

SPARKLING JEWELRY

Set Up Your Work Area.

Lay out all of your materials in front of you and plan out your designs. Spread out some newspapers under your work area before you begin. Keep the packaging in front of you in case you want to refer to the pictures as a guide.

NOTE TO PARENTS: Please read these instructions carefully and completely. Adult supervision is recommended on these projects.

Adding Lava To Your Mesh Jewelry.

First decide what colors you would like to use on your pieces. Start off with a base color and then add details in different colors. Once you have mapped out your design begin to spread the lava onto the mesh pieces to create a thin layer over the mesh. Once you have spread the lava, pat it down onto the mesh lightly to make sure it stays attached. Allow the lava to dry overnight before putting on your jewelry.

Note: You can also use your package or tray to hold your mesh pieces while they dry. Once the lava is dry, you can always add more lava on top to give your pieces extra sparkle.

- For mesh bands: Be sure not to cover the closure hole with lava as this hole will need to stay open so that you can snap on your bands.
- For mesh pendants: Use the colorful string to make cool bracelets or necklaces with your mesh pendants. Cut a piece of cord long enough to wrap loosely around your neck or wrist plus extra inches for knotting. Place the string through the hole on the top of the pendant and then tie a knot to secure.

Adding Lava To Your Charms.

To add lava to your charms simply remove the tops of the heart and star and place the lava on the top and bottom of the charm. Only include enough lava to fill the charm without overflowing. Then close your charms. If you find it hard to close the charms you may have too much lava inside. Just remove a small amount and re-close. Once you are finished adding the lava, use the colorful cording to create 2 beautiful necklaces. Cut a piece of cord long enough to wrap loosely around your neck plus a few extra inches to tie knots at the end. Place the string through the hole on the top of the charm. Then tie a secure knot and cut off excess cord.

Show Off Your Designs!

Shine bright with this Sparkling Jewelry that you create!

Cleaning Instructions

If you get lava in undesired areas, here are some helpful hints to clean it off.

- Before lava has dried: Gently rub the lava off until only a light residue remains. Then soak the item in warm water with soap.
- After lava has dried : Soak the item in warm water with soap. Once the lava has softened gently rub the lava off.
