

SAFARI ADVENTURE

Set Up Your Work Area.

Lay out all of your materials in front of you and plan out your designs. Spread out some newspapers under your work area before you begin. Keep the packaging in front of you in case you want to refer to the pictures as a guide.

NOTE TO PARENTS: Please read these instructions carefully and completely before allowing your children to play with Lava. Adult supervision is recommended on these projects.

Adding Lava To Your Mesh Pieces!

First decide what colors you would like to use on your pieces. Start off with a base color and then add details in different colors. Once you have mapped out your design begin to spread the lava onto the mesh pieces to create a thin layer over the mesh. Once you have spread the lava, pat it down onto the mesh lightly to make sure it stays attached. Allow the lava to dry overnight.

Note: You can also use your package or tray to hold your mesh pieces while they dry. Once the lava is dry, you can always add more lava on top to give your pieces extra sparkle.

Adding Lava To Your Base!

Your base has indented areas that can be decorated using your lava. Simply press the lava into the grass area on your base to make it shine!

Get Adventurous!

Now that you have decorated your mesh pieces and base, let's play! Snap your mesh pieces onto the base to create different scenes and let the adventure begin (see illustration). When you want to change your scene simply remove the mesh pieces and snap them into another location.

PEGS SHOULD SNAP INTO PEG HOLES

Cleaning Instructions:

If you get lava in undesired areas, here are some helpful hints to clean it off.

- Before lava has dried: Gently rub the lava off until only a light residue remains. Then soak the item in warm water with soap.
- After lava has dried: Soak the item in warm water with soap. Once the lava has softened gently rub the lava off.
