

# ART DESK

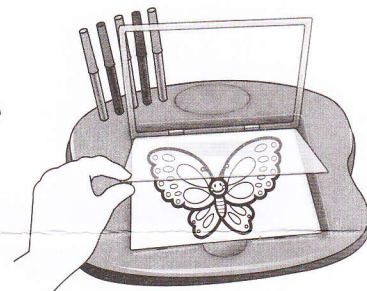

## STEP ONE - SET UP YOUR WORK AREA

Lay out all of your materials in front of you and plan out your designs. Protect your work area by completely covering it with large trash bags or another type of plastic sheeting. Keep the packaging in front of you in case you want to refer to the pictures as a guide.

NOTE TO PARENTS: Please read these instructions carefully and completely. Adult supervision is recommended on these projects.

## STEP TWO - MAKE YOUR DESIGNS!

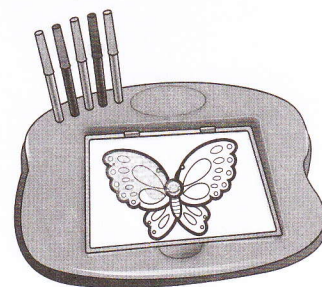

Choose the project card that you want to use to make your design and place it under the removable clear plastic plate on your desk. Pull the frame down and you're ready to start your design! Spread your lava over the design, you can create a whole scene by putting the lava over the entire surface or simply around the design you want to create. Let the lava air dry for a few minutes.

Now it's time to color!

You can color your lava before or after it has dried. If you decide to color your lava before it dries, here are a few helpful hints:

- Keep your marker on a slight angle and lightly color over the top of the lava.
- Do not point your marker straight down into the lava.
- When adding details to your design it is best to wait until the lava has dried.

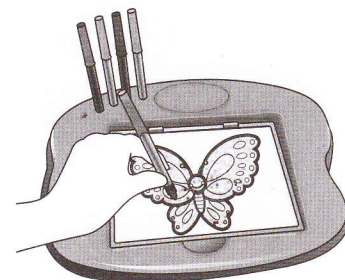

Once you have finished coloring your design set it aside and let it dry overnight. Your desk comes with two removable clear plastic squares so while you let one dry, you can create a new design on the other one!

## STEP THREE - SHOW OFF YOUR DESIGNS!

Now that you have completed your designs, it's time to show them off. Peel the design off the plate and place it on your window, locker, refrigerator and more!

Note: Your design will stick to most smooth surfaces, but must be placed on the surface right after you peel the design.

### Cleaning Instructions:

If you get lava in undesired areas, here are some helpful hints to clean it off.

- Before lava has dried: Gently rub the lava off until only a light residue remains. Then soak the item in warm water with soap.
- After lava has dried: Soak the item in warm water with soap. Once the lava has softened gently rub the lava off.

**WARNING:**  
CHOKING HAZARD - Small parts.  
Not for children under 3 years.
